

Job Description

Position	Developer - VB & C# Winforms & Webforms, SQL
Reporting to	Senior Developer
Location	Hastings
Salary	TBC

Summary

Invest & Fund is committed to building the UK's most trusted peer-to-peer marketplace helping individuals, high net worth lenders, private banks, family offices and institutions achieve attractive, risk-adjusted returns from successful residential development projects. Having already lent over **£45m**, the business is at an exciting time as it seeks to scale and become a market leader in the provision of residential development and bridging finance. Invest & Fund is fully authorised and regulated by the FCA.

This is a fantastic opportunity to join a successful company in a fast moving and busy office environment, contributing to the overall success of a high performing organisation. Our platform is based on .NET, VB.NET, C#, Firebird, including web, mobile and desktop applications.

Working in a small and dynamic team the VB, C# and SQL Developer will work with the business on projects to design, develop and install software solutions which will help our business to continue to be more efficient, agile and responsive to customer need.

Key Accountability

- Delivery of accurate and timely code to meet the needs of the business and its customers
- Communicating effectively within the IT team and with the business to ensure that efficiency of development is maximized

Key responsibilities

- Take ownership of VB, C# and SQL coding workstreams
- Work with developers leading to a rapid growth phase in the company's development
- Help the business become more responsive, efficient and capable of delivering service excellence
- You'll be expected to pick-up a knowledge of the internal workings of company's main systems

Key Skills

- VB & c# winforms & webforms
- SQL
- Ability to work as part of a small team
- Agile development, testing and reporting methodology

- Front end development (html/css/javascript) an advantage
- Production of documentation
- Organised, energized self-starter and with initiative
- Ability to problem solve and suggest/implement alternative options
- Attention to detail and ability to be thorough in implementation, documentation, testing and review
- Strong time management

Key Experience

- Previous development experience
- Knowledge of different software solutions
- Working to agreed timelines
- Some knowledge of Fintech or financial services desirable, but not essential
